

School Admin Portal Functionalities

School-level administration portal with employee permission management

Document Purpose

This document lists the required functionalities for this portal of the School Management ERP. It is focused only on functional scope and can be used for requirement discussion, estimation, UI planning, and development planning.

Portal Scope Summary

Area	Purpose
Main User	School owner/admin who manages the complete school operation
Key Concept	School creates employees and controls what each employee can access through permission management
Core Responsibility	Students, parents, employees, fees, attendance, exams, communication, reports, and school settings

Detailed Functionalities

1. Dashboard & School Overview

- Total students, parents, teachers, and employees summary
- Today attendance summary for students and staff
- Fee collection, pending fee, and overdue fee overview
- Upcoming exams, holidays, events, and announcements
- Pending approvals: leave, admission, certificates, attendance corrections, result publishing
- Quick links for daily operations and important alerts

2. Permission Management System for School Employees

- Create school-level roles such as Principal, Accountant, Class Teacher, Subject Teacher, Receptionist, Librarian, Transport Manager, Hostel Warden, and Custom Role
- Assign permissions module-wise: Student, Fees, Attendance, Exams, Timetable, Communication, Reports, Library, Transport, Hostel, Inventory, Payroll
- Permission actions: view, add, edit, delete, approve, export, print, publish, collect payment, and download documents
- Restrict employee access by class, section, subject, branch, department, or assigned students only
- Create custom permission groups for different employees
- Enable/disable sensitive data access such as fees, salary, documents, medical records, and parent contact numbers
- Activity logs for every employee action
- Approval workflow for critical actions like fee discount, result publishing, student transfer, data deletion, and attendance correction
- Temporary permission assignment for substitute roles or limited-time access
- Block/unblock employee login and reset employee password

3. School Profile & Configuration

- Manage school name, logo, address, contact details, registration number, affiliation details, principal details, website, and official documents
- Academic year/session setup
- Class, section, subject, grading system, working days, school timings, and holiday calendar setup

- Branch management if the school has multiple branches
- School branding for ID cards, certificates, report cards, receipts, and notices
- Notification template configuration for SMS, email, WhatsApp, and push alerts

4. Student Management

- Add, edit, view, archive, transfer, and promote students
- Admission number, roll number, class, section, house, category, and status management
- Student profile with photo, address, medical details, emergency contact, previous school details, and documents
- Parent/guardian linking with one or multiple students
- Bulk import/export through Excel or CSV
- Student ID card generation
- Student history including attendance, fees, results, behaviour, certificates, and communication

5. Parent & Guardian Management

- Create parent accounts and link children
- Manage parent contact details, occupation, address, emergency contacts, and login access
- Support multiple guardians per student and multiple children under one parent account
- Parent communication history and meeting records
- Reset parent password and control parent portal access

6. Employee / Teacher / Staff Management

- Add and manage teaching and non-teaching employees
- Employee profile, qualification, experience, department, designation, documents, joining date, and employment status
- Assign classes, subjects, sections, responsibilities, and reporting manager
- Employee attendance, leave, payroll eligibility, and performance records
- Employee login and permission assignment
- Staff ID card generation

7. Admission & Enquiry Management

- Admission enquiry form and follow-up tracking
- Online/offline admission application
- Document collection and verification
- Admission test/interview scheduling
- Admission approval/rejection workflow
- Convert enquiry/application to student record
- Admission fee collection and receipt generation
- Admission reports by class, source, status, and date

8. Class, Section & Subject Management

- Create and manage classes, sections, subjects, optional subjects, subject groups, and subject codes
- Assign class teachers and subject teachers
- Set class capacity and student allocation
- Manage syllabus, lesson plans, academic calendar, and subject-wise grading rules

9. Attendance Management

- Student attendance by day, class, section, subject, or period
- Teacher and staff attendance
- Late, half-day, leave, and absent marking
- Biometric/RFID attendance integration support
- Attendance correction request and approval workflow
- Low attendance alerts to parents and school admin
- Attendance reports by class, student, employee, date range, and percentage

10. Fees & Payment Management

- Create fee heads, fee groups, class-wise fee structure, student-wise fee assignment, concessions, scholarships, installments, and late fee rules
- Collect fees online or offline
- Generate receipts, invoices, refunds, and fee certificates
- Payment modes: cash, bank transfer, cheque, UPI, card, payment gateway
- Pending fee reminders through SMS/email/WhatsApp/push notification
- Fee reports: paid, pending, overdue, discount, refund, daily collection, payment mode, and class-wise collection

11. Exam, Marks & Result Management

- Create exam types, exam schedules, exam rooms, subject mapping, and marks configuration
- Teacher marks entry with draft and submit workflow
- Internal, practical, theory, grade, and remarks support
- Result approval and publishing workflow
- Report card generation with school branding
- Admit card generation
- Result analytics by student, class, subject, teacher, and term

12. Timetable Management

- Create class-wise, teacher-wise, room-wise, and subject-wise timetable
- Conflict detection for teacher, room, and class schedule
- Substitute teacher assignment
- Exam timetable publishing
- Timetable print/export and visibility control for students/parents/teachers

13. Homework, Assignment & Study Material

- Create homework and assignments by class, section, subject, or student group
- File attachments, due dates, submission status, marks, grading, and remarks
- Upload study material such as PDFs, images, videos, and links
- Track pending and submitted assignments
- Parent visibility for homework and assignment progress

14. Communication & Notices

- School-wide, class-wise, section-wise, student-wise, parent-wise, and employee-wise notices
- SMS, email, WhatsApp, push, and in-app notification support
- Circulars, urgent alerts, event announcements, holiday announcements, and exam notifications
- Parent-teacher communication and meeting requests
- Communication history and delivery status tracking

15. Leave & Approval Management

- Student leave requests from parents/students
- Teacher and staff leave requests
- Leave types, leave balance, leave calendar, and leave approval workflow
- Substitute teacher assignment for approved teacher leaves
- Leave reports and notifications

16. Reports & Analytics

- Student, parent, employee, attendance, fee, exam, result, admission, communication, and certificate reports
- Custom filters by class, section, date, status, employee, and payment mode
- Export to Excel/PDF and print reports
- Dashboard analytics with trends and alerts

17. Optional Operational Modules

- Library management: books, issue/return, fines, barcode/RFID, reports

- Transport management: vehicles, drivers, routes, pickup/drop points, GPS tracking, transport fees
- Hostel management: rooms, beds, wardens, visitors, hostel leave, hostel fees
- Inventory and asset management: stock, vendors, purchase, issue/return, low-stock alerts
- Payroll management: salary structure, attendance-based salary, deductions, payslips
- Certificate management: bonafide, transfer, character, fee certificates, custom templates

18. Security, Audit & Data Control

- Role-based access control with strict permission checks
- Login history, user activity logs, data change logs, and approval logs
- Data import/export controls
- Data backup and restore request support
- Account lock, session timeout, password policy, and optional two-factor authentication

Recommended MVP Scope

- School profile and configuration
- Permission management system
- Student and parent management
- Employee/teacher management
- Class/section/subject setup
- Attendance
- Fees
- Exams/results
- Homework/study material
- Notices/communication
- Reports and audit logs

Important Notes

- All permissions should be role-based and configurable where applicable.
- All important actions should be captured in activity logs for audit and security.
- The UI should be responsive and usable on desktop, tablet, and mobile browser.
- Data export should be controlled by permissions to avoid misuse of sensitive data.
