

Platform Super Admin Portal Functionalities

Top-level SaaS admin portal for managing schools, subscriptions, billing, modules, and platform operations

Document Purpose

This document lists the required functionalities for this portal of the School Management ERP. It is focused only on functional scope and can be used for requirement discussion, estimation, UI planning, and development planning.

Portal Scope Summary

Area	Purpose
Main User	ERP platform owner or top-level super admin
Key Concept	This portal manages all schools as tenants and controls subscriptions, billing, modules, and platform settings
Core Responsibility	School onboarding, subscription management, billing, module access, support, security, and platform analytics

Detailed Functionalities

1. Platform Dashboard

- Total schools, active schools, trial schools, expired schools, suspended schools, total students, total teachers, total revenue, monthly recurring revenue, pending payments, new registrations, support tickets, usage alerts, and system health summary

2. School Management

- Create new school, edit school profile, activate/deactivate/suspend/archive school, assign school admin, upload school logo, manage address/contact/registration details, set timezone/currency/country, view school usage, view school login activity, and manage onboarding status

3. School Onboarding

- Create primary school admin account, configure school modules, academic session, class/section templates, fee templates, grading templates, import initial student/teacher data, onboarding checklist, progress tracking, and welcome email

4. Subscription Plan Management

- Create monthly/yearly/trial/free/custom plans, define pricing, student limit, employee limit, storage limit, branch limit, module access, feature access, usage limits, discounts, taxes, renewal rules, and upgrade/downgrade rules

5. School Subscription Management

- Assign plan to school, renew plan, extend trial, pause/cancel subscription, change plan, manage grace period, expiry reminders, subscription history, payment status, auto-disable expired schools, and manual override for special cases

6. Billing & Invoice Management

- Generate invoices, download invoices, mark paid/unpaid, payment due reminders, tax/GST invoice support, partial payment tracking, refund management, credit notes, receipts, online payment tracking, revenue reports, failed payment reports, and pending payment reports

7. Module & Feature Control

- Create ERP modules, enable/disable modules globally, enable/disable modules per school, plan-wise module access, premium feature control, beta feature control, module usage analytics, and school-wise feature restrictions

8. Platform User & Permission Management

- Create internal platform users such as owner, admin, support, sales, finance, and technical team; role-based permissions; reset password; block/unblock users; and activity logs

9. Support Ticket Management

- View school tickets, assign tickets, set priority, category, SLA, internal notes, replies, attachments, status tracking, escalation, close/reopen tickets, and ticket analytics

10. Announcements to Schools

- Send announcements to all schools, selected schools, plan-wise schools, trial schools, or expired schools; maintenance notices, feature updates, billing reminders, and announcement history

11. Payment Gateway Management

- Configure payment gateway credentials, payment methods, UPI/card/net banking/wallet support, transaction tracking, failed payment tracking, refunds, and reconciliation

12. Notification Gateway Management

- Configure SMS, email, WhatsApp, push notification gateways, notification templates, billing reminders, onboarding emails, expiry alerts, ticket alerts, and usage limit alerts

13. White Label & Branding

- Platform branding, logo, domain/subdomain settings, custom school domain support, custom theme/color, branded login pages, branded invoices, and branded email templates

14. Platform Reports & Analytics

- School growth, revenue, subscription, trial conversion, expired schools, payment collection, module usage, login activity, student/teacher count, support ticket, and exportable reports

15. Audit Logs & Security

- Platform activity logs, school admin activity logs, login history, failed login tracking, IP/device tracking, subscription change logs, billing change logs, permission change logs, suspicious activity alerts, session management, and two-factor authentication

16. Data Backup & Restore

- School-wise backup, full platform backup, scheduled backup, manual backup, restore school data, restore deleted records, backup history, and data retention policy

17. API & Integration Management

- API key generation, school-wise API access, webhook management, payment gateway integrations, SMS/WhatsApp/email integrations, biometric/RFID/GPS integrations, LMS/accounting integrations, and integration logs

18. System Configuration

- Platform name, logo, maintenance mode, default country/currency/language, tax settings, email/SMS storage settings, terms/privacy policy, data retention settings, and global security policies

Recommended MVP Scope

- Platform dashboard

- School creation and management
- Subscription plans
- School subscription assignment
- Billing and invoices
- Module and feature access control
- Support tickets
- Notifications
- Platform users and permissions
- Audit logs and reports

Important Notes

- All permissions should be role-based and configurable where applicable.
- All important actions should be captured in activity logs for audit and security.
- The UI should be responsive and usable on desktop, tablet, and mobile browser.
- Data export should be controlled by permissions to avoid misuse of sensitive data.
